**Quarterly Activities Report**

**Highlights**

- 23,000 tonnes of ore extracted since commissioning of the Sol Plaatje Project (SPP) in August 2016
- Head grade from the pit continuing in line with expectations at circa 2 g/t au
- Production expected to increase to circa 12,000 tonnes per month by the end of March 2017 with increases planned thereafter to 14,000 to 15,000 tonnes per month
- Stage 1 schedule for SPP plans for the extraction of 130,000 tonnes of ore over 12 months with a further 50,000 tonnes schedule in Stage 2 over 6 months
- Planning work now underway to significantly expand the SPP
- Definitive agreements currently being finalised with the mining contractor
- A\$165,000 received in payments from mining contractor to date
- Planning work is underway to enable several other areas to progress to production
- PT Toba Sehatra continuing to progress Derewo

**Review of Operations**

**South Africa**

***Soweto Cluster Gold Project, Central Rand (WWI: 66.6%)***

West Wits Mining Limited (ASX:WWI) (“the Company” or “West Wits”) continued to focus on the development of the Sol Plaatje Project (“SPP”) which is located within the Soweto Cluster Gold Project, Johannesburg, South Africa (“Soweto Cluster”).

SPP is an undertaking to remove, rehabilitate and process a 1,500m section of Kimberly Reef outcrop. To the end of December 2016 approx. 23,000 tonnes of ore had been extracted from the SPP and trucked to the nearby Mogale gold plant. Scheduled production is forecast to continue to ramp over the current quarter to 12,000 tonnes per month with plans to increase production further to 14,000 to 15,000 tonnes per month thereafter.

Planning work is now being undertaken to increase the size of the project with the addition of 3 further pits along strike expanding the tonnes to be extracted and the life of the SPP. Current indications are that the project could sustain significantly higher tonnages than were originally planned at a lower head grade. The Company’s consultants are working closing with the mining contractor on various models for optimising the SPP. This work will also impact the finalisation of the definitive agreement between the mining contractor and West Wits.

Meetings are scheduled in South Africa from the first week of February to progress finalisation of the expanded mine plan. The definitive agreements are targeted to be completed by the end February. Until the definitive agreement is executed the operation of the SPP will continue pursuant to the term sheet on the mutual understanding between the Company and its contractors that adjustments will be required under the final agreement to accommodate the likely expansion of the tonnage recovered at lower grade.

The Company received ZAR 1.7 million (approx. A\$165,000) during the quarter with a further payment for December production still to be finalised. In December approx. 9,000 tonnes was extracted at a head grade of circa 2 g/t au.

The transition of the SPP from target to operational mine is a significant milestone being the first step taken in commercialising the 1.374 M oz gold resource at the Soweto Cluster. In addition to the expanded development of the SPP, the Company is also examining a number of further on surface opportunities to compliment the production at SPP as well as a number of exploration programs which is target the further expanding of the Company's current JORC statement.

<b>Soweto Cluster Gold Project – Global Mineral Resource Estimate – 2 g/t cut-off</b>			
<b>Category</b>	<b>Tonnes Millions</b>	<b>Grade g/t Au</b>	<b>Ounces Au</b>
Measured	2.21	4.25	302,300
Indicated	5.6	3.3	592,500
<b>Measured &amp; Indicated</b>	<b>7.81</b>	<b>3.57</b>	<b>894,800</b>
<b>Inferred</b>	<b>4.9</b>	<b>3.1</b>	<b>489,000</b>
<b>Total</b>	<b>12.7</b>	<b>3.38</b>	<b>1,374,000</b>

*The table above shows the global mineral resource estimate for the Soweto Project within JORC 2012 Code reported at a 2.0 g/t cut-off. Number differences may occur due to rounding errors. Refer original report "Gold Mineral Resource for Sol Plaatje", competent person H B Swart ASX release 14<sup>th</sup> September 2016. The Company is not aware of any new information or data that materially affects the information included in the announcement and confirms that all material assumptions and technical parameters underpinning that estimate continue to apply and have not materially changed. The form and context in which the Competent Persons findings are presented have not materially changed."*

## **Indonesia**

### **Aliuvial Project (WWI:50%) & Exploration Project (WWI:64%), Papua Province**

PT Toba Sejahtra ("Toba") continued in its process of delivering all clear and clean certificates for the Company's IUP's, and forestry permits for the Derewo River Gold Project, Papua Province, Indonesia ("Derewo"). Toba has recently reported on several meetings with high level officials in which the path to achieving clear and clean IUP certification was formulated and agreed. The Board is optimistic of a successful outcome based on the progress which has already been made by Toba and looks forward updating shareholders in due course.

Under Toba's agreement with West Wits, Toba will receive a 30% equity interest in PT Madinah Quarataa'in ("PTMQ"), the West Wits subsidiary which holds the licences for the Derewo project on granting of clean and clear certificates and forestry permits for Derewo as well as securing safe access to the project site.

Toba is the holding company for a group of companies which has interests in energy and plantation resources. Toba Sejahtra was founded in 2004 and presently has four major business areas: coal, oil and gas, power plant and agriculture.

**Notes**

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
