Company Highlights

- South Africa
 - near surface and underground targets
 - 1.326m oz JORC resource ¹
 - Measures: 302,000
 - Indicated: 582,500
 - Inferred: 441,000
 - Historic estimate of 12.8m oz at 4.6g/t
 - 31.8m ozs Au produced historically

- Indonesia
 - High grade placer deposit
 - Project show early stage similarities with discoveries inc; Porgera, Edie Creek, Wau
 - Independent geologists believe source of nuggets likely to be local, based on the size and shape of the nuggets discovered

Gold mining underway at Sol Plaatjies Project

Highlights

- Mining operations have commenced on Stage 1 with a minimum of 130,000t of ore to be processed in the first 12 months
- Expectations that higher tonnages will be available either concurrently or subsequent to Stage 1 from Sol Plaatjies
- West Wits to be paid at a rate equal to prevailing price of 0.6 grams of gold (currently circa USD \$25) for each tonne of ore mined
- Potential upside payments through 50:50 share with contractor of surplus cash after costs, 0.6 g/t payment to West Wits and 0.4g/t payment to the contractor
- Planning and design is underway to bring numerous other ore positions to the point of mineability, within the previously announced 1.3 Moz JORC resource.
- Pursuing the low risk business model of using third party contract mining and treatment of gold ore, obviating the need for West Wits to commit to operating and capital costs.

West Wits Mining Limited (“West Wits” or “the Company”) is delighted to announce mining is underway at Sol Plaatjies Project (“Sol Plaatjies”) within the Soweto Cluster prospecting right area, Johannesburg, South Africa. With pre-stripping having been completed over the last couple of weeks the extraction of the first ore from the open pit is expected to be recovered within a few days.

The first stage provides for the removal of circa 130,000 tonnes of ore material over 12 months from the first two of five planned pits. Indications are that at least another 50,000 further tonnes are available in the second stage.

Michael Quinert, Chairman commented, “This is an important milestone for the Company on its path to monetise the significant gold resource at the Soweto Cluster. Sol Plaatjies is the first step, providing cash flow that will be applied to expedite our development plans for the whole tenement.”

For and on behalf of the board

Michael Quinert
 Chairman
 West Wits Mining Limited
